## EDUCATION

Bina Nusantara University, Jakarta  
**Bachelor of Computer Science, March 2023**

September 2019 – March 2023  
GPA: 3.65 / 4.00

## SUMMARY

Full-Stack Software Engineer with experience building and maintaining web applications across banking, finance, and insurance sectors. Strong foundation in backend (ASP.NET, Java Spring, SQL Server) and frontend (React, Redux, Next.js).. Able to join immediately and open to relocation to Ho Chi Minh City

## EXPERIENCES

### Software Developer

PT Bank Mandiri Tbk

August 2024 – Present

- Developed and optimized SQL Server scripts supporting reconciliation processes for millions of banking records.
- Improved legacy web applications and collaborated with operations teams to enhance system performance using Java Springboot.

### Senior Software Developer

PT Bank Negara Indonesia Tbk

August 2023 – July 2024

- Built and debugged loan application modules using ASP.NET MVC + MSSQL.
- Improved features in legacy systems and ensured code quality through structured code reviews.

### Software Developer

PT Adicipta Inovasi Teknologi

February 2022 – April 2023

- Developed multi-finance web applications using ASP.NET MVC, Core Framework, and MSSQL.
- Built reports (RDLC), workflows, APIs, and financial journal modules.
- Mentored interns on C#, ASP.NET, SQL Server, and internal frameworks.
- Conducted deployment and implementation for new employees and interns.

### Software Developer (Internship)

PT Asuransi Harta Aman Pratama Tbk

September 2021 – January 2022

- Built internal systems using Laravel + MySQL.
- Enhanced and maintained existing web applications.
- Delivered deployments for internal users.

### Software Developer (Internship)

Bina Nusantara IT Division

March 2020 – February 2021

- Developed fullstack features using ASP.NET MVC + MSSQL for a Project Management System (tasks, timelines, and user roles).
- Migrated data from old to new database structures.

## PROJECT

### Freelance Project – Singapore Client

- Frontend development using ReactJS and Redux for an e-commerce platform. Built dynamic product pages, cart interactions, state management flows,
